Why a multiverse?

We want to bring to you a Project with infinite possibilities of expansion; to get into different kind of user profiles of gaming world. Looking for the best way to get flexibility and entertainment taking into account the different preferences and capabilities, furthermore the chance to chose the game/s to focus the strategy and get the best yield.
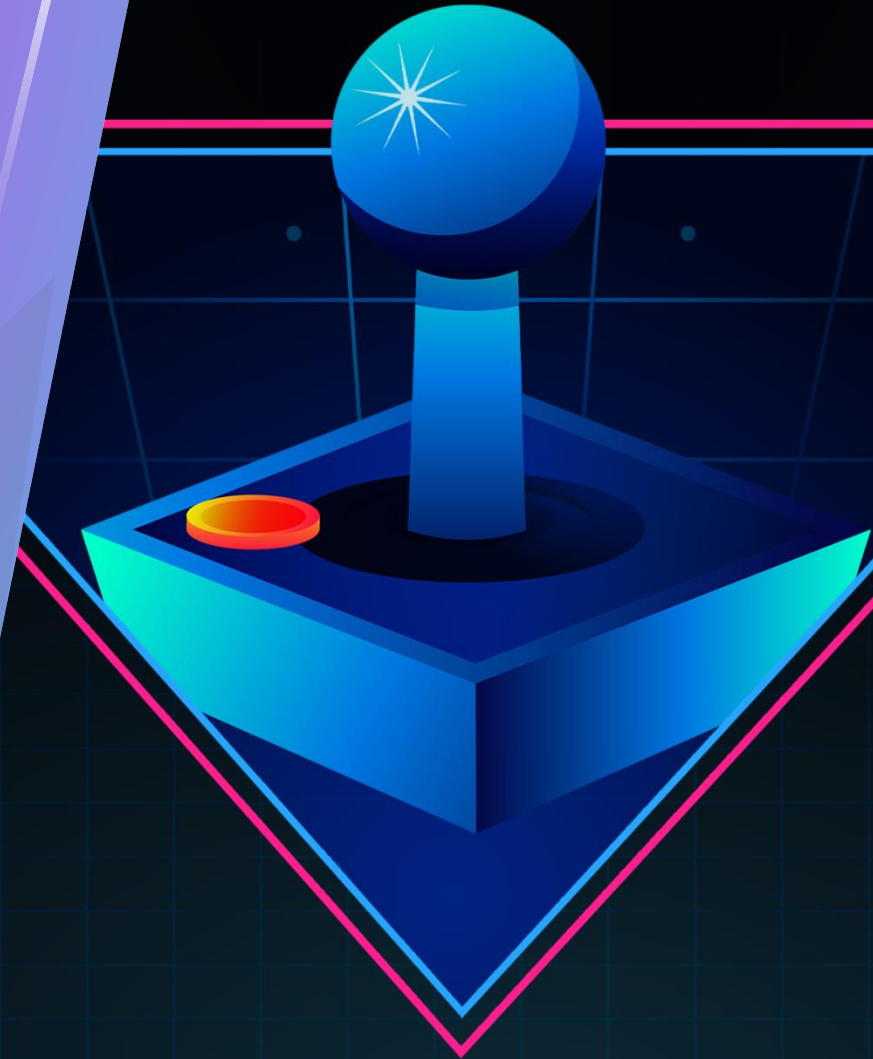

What does it offer?

Arcade Fantasy brings to you a multiverse of NFT games where skill and flexibility are the most important elements because the plays are totally random.

From the most retro and simplest until the hardest and most complex games without losing the most important thing: fun.

In Arcade Fantasy, we want to recover the thing that never should have been disappeared in the Blockchain world; *Play-to-Earn games(Maybe, Click-to-Earn?)* We bring to you a PlayFun&Win, ¡yes, man!. Well, maybe we have invented this word ☺; but we are sure that this comes to stay and you will love it 😎.

Highlights

LIMITED AND EXCLUSIVE

Multiverse of exclusive games with limited entrance.

NO TOKENOMICS

Without tokens of the Project. The player could get tickets to the tournaments with different crypto.

NFT LICENSES

Each game of the platform comes with an NFT collection (With the NFT you could have access to the game).

What makes the difference with other projects?

➢ Economy based on the simplicity.

➢ No Tokenomics

➢ We reward the skill, effort and dedication

➢ We launch the platform with the beta of the first game available right now, Bunny Runners!

➢ Easy, fun and addictive playstyle getting a real Play-to-Earn.

Nowadays, there are a lot of Play-to-Earn games in the Blockchain, most of them based on a pyramidal drawing where the first holders of the game are the most beneficed and this is the main reason why a lot of this kind of games has died.

How could all of us win? Easy answer, it's not possible.
We work with non pyramidal rewards.

How are you going to win in Arcade Fantasy games?

Easy, your profit will depends on your player skill and strategy.

VipCards

Arcade Fantasy it presents into the Blockchain world with a functional product. Our BETA version of Bunny Runners is our presentation card of a concluded Project; however, to get the ambitions upgrades that the game will have in the Gold version and expand new developments, its necessary to get funds.

General explanation

What is Bunny Runners?

Is and NFT game where users can compete between them betting the native token of the Blockchain.

For this game it has been designed 5 characters with different rarity:

➢ Common, Rare, Epic, Legendary and Mystic

The option to play with one of them depends on the balance or type of NFTs:

➢ Common, Rare, Epic and Legendary are based on the balance of NFTs, 1, 3, 5, y 10 respectively. Mystic: Acquired by buying the NFT, different from commons.

Rarity	Common	Rare	Epic	Legendary	Mystic
Player					
Quantity of NFTs	1	3	5	10	1 (Mystic)

First presentation: Basic Version

Bunny runners is a 2D platform game for computer, where a brave bunny has to run the map dodging the enemies and jumping the rifts on the floor to get the maximum amount of coin and get the best score, seems easy right?

Show that skill and adaptability are the best factors because luck couldn't be with you always.

Do you need to collect the maximum amount of gold coins on the way, trying to avoid the holes and dodging the Juaped Vultures, one kind of vulture of that place, carrying poison that could kill you instantly with one single hit, so be careful.

Run far away picking up more coins tan other players, dodging all the difficulties on your way but remember that that the number of lives is low.

Show your best skills and go for the prize!

Collect all the coins that you can pick up in the lowest possible time and then send your score to the tournament contract.

When all the 3 participants complete the games, you could check your scoreboard and get your rewards.

Story:

Start the adventure

Four different classes of special bunnies claimed as protectors of the Burbuland Kingdom, are called by the queen Ékate because they are the best runners in the Kingdom. All of them, are called to rescue all the gold coins that had been stolen by Silco, the Evil Fox, who taking advantage of a day of commemoration where everyone in the castle was enjoying and carelessly, the Evil Fox Silco got infiltrated with his cunning in the vaults where he found the few gold reserves that they had, taking it for himself in large bags but... he wasn't lucky at all, the Bunny Runners, defenders and caretakers of the castle at the request of the queen Ékate ran immediately after him to recover the treasure.

The Evil Fox ran very fast with the large bags of coins between hard and dangerous ways with holes. On the way, he missed the coin through a little hole in the bags. The Bunny Runners go to get all the coins, one by one, to get them back to the Kingdom. The thing is none knew that one common bunny that belongs to the village, with brave and self confident , went out to get the coins too and show to the queen that he can be the future guardian and protector of the castle.

The 5 bunnies are conscious that the way won't be easy but they are ready to recover the maximum amount of gold although they die on the mision.

NFTs of the game and the grade of rarity:

NFT´s:

NFTs: We have designed and created a collection of 21.500 limited NFTs for Bunny Runners. These are lovely and weird bunnies that will be on sell through our platform.
They are divided in 2 groups:
Commons:

20.000 units

Depends on the number of NFTs that the user got, the grade of rarity will raise, giving it Access to more valuable tournaments.

Mystics:

1,500 units

It gives access to custom tournaments.

Grade of rarity – Characters

The grade of rarity of the user depends on the number or kind of NFTs that the user got in the wallet.

We have 5 cute bunnies for his game, the use of each player depends on the grade of rarity f the user.

Rarity		Lives	Daily Tournaments (Gold Version)
Common	1 NFT Common	❤❤	5
Rare	3 commons NFT´s	❤❤❤	7
Epic	5 commons NFT´s	❤❤❤❤	9
Legendary	10 commons NTF´s	❤❤❤❤❤	12
Mystic	1 mystic NFT	❤❤❤❤❤❤	15

General Rules

Despite of our effort and performance avoiding cheaters, we know that everything in this life can be hacked, so we will apply these rules:

➢ Any bad use of the games that make up this platform.

➢ Taking some advantage of possible bugs that could arise at some point.

➢ Use of Bots, exploits or any program that can give some advantage.

The user will be punished (BANNED) with the blocking of his account and the use of your NFT on our platform.
